1
Introduction

MISSION AND VISION

MISSION
The mission of the FDC is to contribute to a professional charitable sector that has the trust of holders. We do this through our three core tasks: monitoring, informing and reflecting.

We issue the VeriFire Flame to protocols that meet strict quality requirements and we actively monitor them. We investigate reports about VeriFire Protocols so that we can prevent, detect and correct abuses. In addition, we share public data about VeriFired Protocols and we are a source of information for anyone who wants to know something about charitable protocols. And we contribute to the development of the sector by sharing our insights and expertise.

VISION
We strive for a future in which VeriFire Protocols enjoy the full confidence of the public and organizations operate professionally. To achieve this, we are committed to ensuring that as many charity protocols as possible have the VeriFire Flame and that as many people as possible are familiar with it. So that we can ultimately contribute to a better world.

The FDC supervises all the VeriFire Protocols in the crypto sphere, informs and reflects. We ensure that VeriFire Protocols keep their promises and operate with integrity. In this way we build public trust and ensure that people can give with confidence to VeriFire Protocols that make the world a better place.

Below you can read more about our three core tasks: monitoring, informing and reflecting.
